

## Risk Factors for Suicidal Ideation of the General Population (J Korean Med Sci. 2013 Apr;28(4):602-607)

Seung-Min Bae, Yu Jin Lee, In Hee Cho, Seog Ju Kim, Jeong Soo Im, and Seong-Jin Cho

### To the Editor:

They stated that they used STAXI in their article. However, when I checked the list of references, they listed as follows:

14. Spielberger CD. Manual for the State-Trait Anxiety Inventory. Palo Alto: Consulting Psychologists Press, 1983.

This is the article for STAI.

Please check this one.

Kind regard

Chieko Hasui, PhD

Research Fellow of Japan Society for the Promotion of Science,  
Tokyo International University.

### The Author Response:

Dear Chieko Hasui

We would like to thank to Chieko Hasui for the helpful point regarding a reference of our publication in J Korean Med Sci.

As Chieko Hasui pointed out, there was a mistake in a reference of our paper. The correct reference for the State-Trait Anger Expression Inventory of our publication is as follow "Spielberger CD. Manual of State-Trait Anger Expression Inventory. Psychological Assessment Resources, 1987".

### REFERENCE

1. Spielberger CD. *Manual of State-Trait Anger Expression Inventory*. Psychological Assessment Resources, 1987.
