### To the Editor:

The authors regret that there were errors in text. This notice corrects the percentage of participants who were unaware of HCV disease.

### Content of correction:

<Before>

Of the participants, 24.6% were unaware of HCV disease, and only 23.7% thought that the treatment was necessary for HCV infection before participating in the study.

<After>

Of the participants, 75.4% were unaware of HCV disease, and only 23.7% thought that the treatment was necessary for HCV infection before participating in the study.
