

Supplemental Data Fig. S1. Differences in (A) ETP, (B) peak thrombin, (C) lag time, and (D) time to peak between the accord group (INR <2.0 by both CoaguChek XS Plus and ACL TOP 750) and discrepancy group 2 (2.0 ≤ INR ≤ 3.0 by CoaguChek XS Plus and INR <2.0 by ACL TOP 750). The red symbol in Fig. S1D indicates a value higher than the upper outer fence, which is calculated by adding three times the interquartile range to the 3rd quartile.

Abbreviations: ETP, endogenous thrombin potential; INR, international normalized ratio.
