Supplementary Figure 1. Comparison of dose-normalized pharmacokinetic parameters ($C_{\text{max}}$/Dose, $\text{AUC}_{\text{last}}$/Dose, and $\text{AUC}_{0-30\text{min}}$/Dose) among doses of fluticasone (A, B), salmeterol (C, D), and tiotropium (E, F). Box presents median (solid line), 25th (lower line) and 75th (upper line) percentile. $C_{\text{max}}$, maximum plasma concentration; $\text{AUC}_{\text{last}}$, area under the plasma concentration-time curve from time zero to the last observed time point; $\text{AUC}_{0-30\text{min}}$, AUC from time zero to 30 minute.
