Supplementary Fig. 1. Endoscopic activity score for intestinal BD was correlated significantly with both CRP level ($\gamma=0.329$, $p=0.002$) and ESR ($\gamma=0.298$, $p=0.006$), but not with sTREM-1 level ($\gamma=0.166$, $p=0.132$). Correlations between variables were analyzed using Spearman’s rank correlation. sTREM-1, soluble triggering receptor expressed on myeloid cells-1; CRP, C-reactive protein; ESR, erythrocyte sedimentation rate.
