In the article entitled “Comparison of safety and efficacy between therapeutic or intermediate versus prophylactic anticoagulation for thrombosis in COVID-19 patients: a systematic review and meta-analysis,” there was an error in Results section of the abstract. In the sentence “In the severe patients, the incidence of thromboembolic and bleeding events in the therapeutic or intermediate.” should be:

“In the severe group, the incidence of thromboembolic and bleeding events in the therapeutic and prophylaxis groups was not statistically different.”

Furthermore, the city of Myongji Hospital was inadvertently omitted, and it should be included as “Goyang.”
