

Correction of dosage of the drug: Post-infectious basal ganglia encephalitis and axonal variant of Guillain-Barré syndrome after COVID-19 infection: an atypical case report

Jiwon Yang, Dong-Jin Shin, Hyeon-Mi Park, Yeong-Bae Lee, Young-Hee Sung

Department of Neurology, Gil Medical Center, Gachon University College of Medicine, Incheon, Korea

In published article by Yang et al., the dosage of intravenous immunoglobulin has been incorrectly spelled as 0.4 mg/kg/day. The correct dosage is 0.4 g/kg/day.

We apologize for any inconvenience caused.
