The original version of the article contained a mistake.

We placed black bars over the eyes of the patient in Fig. 1 to protect the identities of patients. Unfortunately, however, the black bars covered the yellowish plaque lesions in both the lower eyelids.

We apologize for this error.

The corrected Fig. 1 is given below.

**Fig. 1.** A physical examination of the patient shows relatively well-demarcated yellowish plaque lesions in both the lower eyelids, and the lesion on the right side was more prominent.
