

Prevalence of Depression and Glucose Abnormality in an Urbanizing Rural Population of Bangladesh

Khurshid Natasha^{1,2}, Akhtar Hussain¹, A. K. Azad Khan², Bishwajit Bhowmik^{1,2}

¹Institute of Health and Society, Section for International Health, University of Oslo, Oslo, Norway,

²Bangladesh University of Health Sciences, Diabetic Association of Bangladesh, Dhaka, Bangladesh

Diabetes Metab J 2015;39:218-229. <http://dx.doi.org/10.4093/dmj.2015.39.3.218>

The chronology of the authors can be changed like:

Khurshid Natasha, Bishwajit Bhowmik, A. K. Azad Khan, Akhtar Hussain

Prof Akhtar Hussain did not contributed to the finalization of the script but he had intellectually contributed to the conceptualization, designing improvisation and some data presentation. He is not responsible for the mistakes submitted as final version. As the lead author Khurshid Natasha takes the responsibilities and regrets all the error.

We do apologize for the incorrect statement that the protocol was approved by the Norwegian Ethical Committee, as already provided information regarding the Chandra Diabetes Rural Study (CRDS) for our other papers published in this Journal (*Diabetes Metab J* 2015;39:272). Hope that the Journal will see that no unethical research is conducted, the procedure followed ethical principal for Medical research following Helsinki Declaration.
