Retraction to: Neonatal Medicine <https://doi.org/10.5385/nm.2021.28.2.72>

The editors of Neonatal Medicine have confirmed that this paper and “jejunal atresia due to heterotopic pancreatic intussusception. *Journal of Pediatric Surgery Case Reports* 2021;66:101805” have been duplicated with the identical content. It was difficult to prove that the researchers’ conduct was intentional, but their understanding of publication ethics has been deemed insufficient. By the *Neonatal Medicine* Ethics Committee, this paper has been retracted from the *Neonatal Medicine*.
