Ann Rehabil Med 2016;40(2):279-287

To the Editor,

After publication of our article, we found that an error in wording in the abstract should be corrected.

The correct sentence is as follows, with changes in bold font:

"About 69% of the respondents replied that they did **not** have any standardized protocols for performing botulinum toxin injection in patients using anticoagulants. Only 1 physiatrist replied that he had encountered a case of compartment syndrome."

We apologize for any inconvenience this may have caused.

Yours sincerely,  
Yongjun Jang
