

S3 Table. Growth inhibition, CI, and DRI in 5-fluorouracil plus [V⁴Q⁵]dDAVP combinational studies in CT-26 CRC cells

| 5-Fluorouracil (μ M) | V ⁴ Q ⁵ [dDAVP] (μ M) | % Inhibition (\pm SEM) | CI | DRI |
|------------------------------|---|------------------------------|------|------|
| 0.25 | 0 | 7.7 \pm 2.2 | - | - |
| 0.5 | 0 | 12.3 \pm 2.1 | - | - |
| 0 | 1 | 19.1 \pm 3.1 | - | - |
| 0.25 | 1 | 26.7 \pm 2.9 | 0.81 | 5.26 |
| 0.5 | 1 | 33.6 \pm 3.2 | 0.70 | 3.76 |

CI, combinational index; DRI, dose reduction index; CRC, colorectal cancer; SEM, standard error of mean.
