

S13 Fig. Kaplan-Meier survival curves of different locally advanced or metastatic pancreatic cancer patients subgroups in training set. (A) Data compares with aggressive treatments vs without aggressive treatments ($p=0.837$) in patients that fibrinogen-to-albumin ratio (FAR) ≤ 0.079 . (B) Data compares with aggressive treatments vs without aggressive treatments ($p=0.837$) in patients that FAR > 0.079 . WAT, with aggressive treatments; WOAT, without aggressive treatments.
