

**S5 Fig.** *BRAF* V600E-mutated Adenocarcinomas with solid pattern. (A-C) Adenocarcinoma showing a solid pattern in approximately 40% of the total tumor volume (A). Tumors also had a papillary pattern in approximately 30% (B) with VE1-positive (C). (E, F) This adenocarcinoma was VE1-positive (F) and exhibited a solid pattern in the central and a micropapillary pattern in the periphery. Scale bar=300  $\mu$ m (A-F).
