

**S3 Fig.** Objective response rates (ORRs) by T790M positivity status in liquid biopsy samples. ORRs according to Response Evaluation Criteria in Solid Tumors in the response evaluable population are shown by T790M positivity in type of liquid biopsy samples. BAL, bronchoalveolar lavage fluid; CR, complete response; PD, progression of disease; PE, pleural effusion; PR, partial response; SD, stable disease; T790M, (c.2369C>T; p.Thr790Met).
