

S1 Table. Comparison of two PSA parameters according to the presence of DM or LRR after SRT

PSA parameter	Mean±SD		p-value ^{a)}	Mean±SD		p-value ^{a)}
	DM (-)	DM (+)		LRR (-)	LRR (+)	
Absolute PSA (ng/mL)	2.09±3.91	4.31±9.51	0.121	2.7±6.7	2.3±1.9	0.642
PSA-DT (mo)	13.79±17.98	7.31±9.90	0.033	11.2±1.7	15.0±24.3	0.160

DM, distant metastasis; LRR, locoregional recurrence; PSA, prostate specific antigen; PSA-DT, PSA doubling time; SD, standard deviation; SRT, salvage radiotherapy. ^{a)}p-value by t test.
