

S4 Fig. Receiver operative characteristic curves for grade ≥ 2 lower gastrointestinal (GI) toxicities versus cumulative EQD₂₃ D_{2cc} of sigmoid colon (A), grade ≥ 2 lower GI toxicities versus cumulative EQD₂₃ D_{2cc} of rectum (B), grade ≥ 2 urinary toxicities versus cumulative EQD₂₃ D_{2cc} of bladder (C), grade $\geq 2/3$ lower GI toxicities versus cumulative EQD₂₃ of rectal point (D). (A-C) Calculated based on data from the image-guided brachytherapy group. (D) Calculated based on data from the conventional brachytherapy group. CI, confidence interval.
