

S1 Table. National HPV vaccination rates for the project year according to birth year

Year of birth	No. of subjects	1st dose		2nd dose	
		No. of vaccinated people	Vaccination rate (%)	No. of vaccinated people	Vaccination rate (%)
2003	236,808	146,429	61.8	127,780	54.0
2004	228,031	166,245	72.9	147,318	64.6
2005	210,134	183,873	87.5	160,534	76.4
2006	216,856	192,502	88.8	136,820	63.1
2007	240,561	215,098	89.4	163,943	68.2
2008	227,196	199,075	87.6	149,306	65.7
2009	216,821	182,764	84.3	131,584	60.7

From 2016-2021, the target age for vaccination was 12 years, and the vaccination rate was aggregated based on the project year. HPV, human papillomavirus.
