

**S5 Table.** Outcomes of reported studies regarding bulky nodal disease in uterine cervix, oral cavity, and oropharyngeal cancer

Type of cancer	No. of patients	No. of patients with bulky nodal disease (criteria for bulky disease)	Radiation dose	Outcomes
Uterine cervix [1]	161	70 (> 2 cm)	46-60 Gy	Increased regional recur (HR 1.9)
Uterine cervix [2]	208	22 (> 2 cm)	66.9-74.1 Gy	Pelvic recur 2/22 (total 5/208)
Uterine cervix [3]	151	151 ( $\geq$ 1.5 cm)		Survival 45% in median follow-up of 45 mo
Oral cavity [4]	14,554	2,665 (> 2 cm)	N/A	Poor OS of HR 2.14-2.35 but not in MVA
Oropharynx [5]	1,907	133 (> 6 cm)	N/A	5-Year OS 59% (compared to 80%-83%)
Oropharynx [6]	156	79 (> 6 cm)	N/A	3-Year DFS 88% (100% for non-bulky)

DFS, disease-free survival; HR, hazard ratio; N/A, not available; OS, overall survival.
