

Supplementary Fig. 1. Related to Fig. 1. Effects of hydrogen peroxide (H₂O₂) on cell viability. House Ear Institute-Organ of Corti 1 (HEI-OC1) cells were incubated for 72 h with various concentrations of H₂O₂ (0–120 μM). There was significant difference when the cells were treated with 30 μM H₂O₂. *p < 0.05 vs. control.
