

Supplementary Fig. 1. A schematic diagram of processing time operation in animal experiment. STZ, streptozocin; IHC, immunohistochemistry; HE, hematoxylin-eosin; WB, Western blot; IF, immunofluorescence.

A**B****C**

Supplementary Fig. 2. Western blots for the expression of related proteins. Western blots for M1 macrophage marker CD80 (A) in rats as well as the levels of IL-1 β , TNF- α , IL-4, IL-10, CD31, VEGFA, and collagen I/III (B, C) in mouse fibroblasts treated with paeonol alone. IL, interleukin; TNF- α , tumor necrosis factor α .
