CI, confidence interval; K-HHIE, Korean version of the Hearing Handicap Inventory for the Elderly; PTA, pure tone audiometry; FG, functional gain; SDS, speech discrimination score; HINT, hearing in noise test; CA-f, central auditory frequency pattern test; CA-d, central auditory duration pattern test; CA-Di, central auditory dichotic test; K-IOI-HA, Korean version of the International Outcome Inventory for Hearing Aids.

Pearson's correlation coefficient and linear regression (*P<0.05).
