

**Supplementary Table 2.** Performance of MRE Scores in Discriminating Active Disease (SES-CD  $\geq 3$ ) as Measured by AUC, Stratified by Degree of Bowel Distention

Score	Good distention (n = 81)		Moderate-poor distention (n = 56)		P-value
	AUC	SE	AUC	SE	
MaRIA	0.803	0.052	0.713	0.075	0.32
sMaRIA	0.759	0.054	0.704	0.070	0.53
CDMI	0.789	0.051	0.738	0.070	0.55
London	0.718	0.057	0.595	0.088	0.24

MRE, magnetic resonance enterography; SED-CD, Simplified Endoscopy Score for Crohn's Disease; AUC, area under the receiver operating characteristic curve; SE, standard error; MaRIA, magnetic resonance index of activity; sMaRIA, simplified MaRIA; CDMI, CD MRE index.
