

Supplementary Table 1. Correlation between Ulcerative Colitis Endoscopic Index of Severity and Disease Activity Indices

Variable	Value
Partial Mayo Score	0.45
Mayo Endoscopic Score	0.93
Total Mayo Score	0.70
Fecal Calprotectin	0.48
Geboes Score	0.39
Continuous Geboes Score	0.44
Nancy Index	0.43
Robarts Histopathology Index	0.42

The values depicted are Spearman's correlation coefficient (ρ). All the values are significant at $P < 0.001$.

Supplementary Table 2. Correlation between Fecal Calprotectin and Disease Activity Indices Stratified According to Disease Extent

Variable	Proctitis (n = 48)	Left sided colitis (n = 238)	Pancolitis (n = 61)
Partial Mayo Score	0.47	0.33	0.39
Mayo Endoscopic Score	0.48	0.45	0.52
Total Mayo Score	0.54	0.43	0.48
Ulcerative Colitis Endoscopic Index of Severity	0.51	0.45	0.50
Geboes Score	0.55	0.45	0.41
Continuous Geboes Score	0.62	0.47	0.43
Nancy Index	0.53	0.58	0.47
Robarts Histopathology Index	0.59	0.46	0.44

The values depicted are Spearman's correlation coefficient (ρ). All the values are significant at $P < 0.001$.
