

Supplementary Table 1. Multivariate Analysis of the Prognostic Factors Associated with Stent Patency^a in Patients with Colorectal Cancer

Prognostic factor	Odds ratio (95% CI)	P-value
Sex (female)	2.880 (0.953–8.701)	0.061
Age	1.020 (0.980–1.061)	0.326
Type of stent (uncovered stent)	0.965 (0.332–2.803)	0.947
Length of stent	1.142 (0.917–1.421)	0.235

^aStent patency: free of occlusion and migration.
CI, confidence interval.
