마약류 취급보고 제도 질의·응답집

[의료기관편]

질문 마약류를 혼합한 수액제도 사용하고 남은 마약류에 해당되나요?

분류 [사용하고 남은 마약류 폐기]

■ 답변

의료용 마약류를 혼합한 수액제가 환자에게 투약되고 남았을 경우 이미 마약류취급의료업자의 처방에 따라 조제된 것으로 사용하고 남은 마약류가 아닌 폐의약품에 해당합니다.

다만, 의료기관에서 사용하고 남은 마약류를 폐기할 때 이를 함께 폐기하는 것이 바람직합니다.

■ 관련법규

사용하고 남은 마약류의 폐기보고 및 절차 합리화 방안(마약관리과 -6754호, 2018.4.13)

제11조, 시행규칙 21조

<Drug Report System Q&A, English translation version>

Question: Do residual narcotics mixed with intravenous fluid after administration to a patient count as residual narcotics?

Category: Disposal of Residual Drugs

Answer: If intravenous fluid mixed with medical narcotics has been administered to a patient and residual fluid remains, it is considered medical waste according to the disposal regulations of the drug-handling entity and not residual narcotics.

However, it is recommended that medical institutions dispose of the residual narcotics mixed with intravenous fluid together when disposing of the residual narcotics.

Related Regulations: Disposal Report and Procedures for Residual Drugs (Narcotics Control Act No. 6754, April 13, 2018)

Relevant Department: Narcotics Control, Ministry of Food and Drug Safety
