

**Supplementary Figure 1.** Propensity score-matched analysis of overall survival and recurrence-free survival according to subgroup based on the number of tumors. (A) Overall survival in patients with two tumors according to the treatment. (B) Recurrence-free survival in patients with two tumors according to the treatment. (C) Overall survival in patients with three tumors according to the treatment. (D) Recurrence-free survival in patients with three tumors according to the treatment. TACE, transarterial chemoembolization.
