

Supplementary Table 2. Recurrence of hepatocellular carcinoma after liver resection (LR) and transarterial chemoembolization (TACE)

Variable	LR (n=107)	TACE (n=237)	P-value
Recurrence	76 (71.0)	190 (80.2)	0.083
Recurrence pattern			
Intrahepatic	75 (98.7)	187 (98.4)	0.296
Extrahepatic	1 (1.3)	0 (0.0)	
Both	0 (0.0)	1 (0.5)	
Others*	-	2 (1.1)	
Treatment after recurrence			
No further treatment	1 (1.3)	7 (3.7)	0.589
TACE	56 (73.7)	132 (69.5)	
Repeated resection	2 (2.7)	2 (1.1)	
Ablation [†]	15 (19.7)	34 (16.5)	
Radiation treatment	1 (1.3)	9 (4.7)	
Liver transplantation	1 (1.3)	5 (2.6)	
Systemic treatment	0 (0.0)	1 (0.5)	

Values are presented as number (%).

*Others included patients who died due to a liver-related death after transarterial chemoembolization; [†]Ablation included radiofrequency ablation and percutaneous ethanol injection therapy.
