

**Supplementary Table 5.** Distribution of observations with respect to the presence of nonperipheral washout and enhancing capsule on CT and HBA-MRI

Observation method	Size, 10-19 mm		Size, ≥20 mm	
	Enhancing capsule (+)	Enhancing capsule (-)	Enhancing capsule (+)	Enhancing capsule (-)
CT				
Nonperipheral washout (+)	12	29	73	63
Nonperipheral washout (-)	0	5	1	2
HBA-MRI				
Nonperipheral washout (+)	18	21	74	64
Nonperipheral washout (-)	1	4	0	6

CT, computed tomography; HBA-MRI, hepatobiliary contrast agent-enhanced magnetic resonance imaging.
