

**Supplementary Table 6.** Distribution of observations with respect to the pathological diagnosis and KLCA-NCC guideline on CT and HBA-MRI

Pathological diagnosis	HCC (n=209)	cHCC-CCA (n=17)	CCA (n=8)	Others* (n=3)
CT				
Indeterminate	40	10	6	2
Probable HCC	1	0	0	0
Definite HCC	168	7	2	1
HBA-MRI				
Indeterminate	32	8	7	1
Probable HCC	12	0	0	0
Definite HCC	165	9	1	2

KLCA-NCC, Korean Liver Cancer Association-National Cancer Center; CT, computed tomography; HBA-MRI, hepatobiliary contrast agent-enhanced magnetic resonance imaging; HCC, hepatocellular carcinoma; cHCC-CCA, combined hepatocellular carcinoma-cholangiocarcinoma; CCA, cholangiocarcinoma.

\*Include two eosinophilic abscesses and one metastasis from colon cancer.
