

Supplementary Table 3. Hypoglycemia detected by continuous glucose monitoring in patients achieving predefined level of HbA1c at week 12

Variable	Teneligliptin (n=34)	Placebo (n=30)	P value
HbA1c <7% and TBR <1%	24 (75.00)	8 (26.67)	<0.001
HbA1c <6.5% and TBR <1%	15 (46.88)	2 (6.67)	0.001

Values are presented as number (%).

HbA1c, glycosylated hemoglobin; TBR, time below target glucose range.
