

Supplementary Fig. 1. Intraperitoneal glucose tolerance test (IPGTT) and area under the curve (AUC). (A) IPGTT in 4 weeks after transplantation ($n=4$ for control [Con]; $n=7$ for Diff [-]; $n=6$ for Diff [+] group). (B) IPGTT in 8 weeks after transplantation ($n=6$ for Con; $n=6$ for Diff [-]; $n=5$ for Diff [+] group). (C) AUC of IPGTT in 4 weeks after transplantation. (D) AUC of IPGTT in 8 weeks after transplantation. Diff (-), undifferentiated neonatal porcine pancreatic cell cluster (NPCC); Diff (+), differentiated NPCC.
