

Supplementary Table 4. Association of tertiles of resected volume in the DP and PD groups

DP group		PD group	
Tertiles of resected volume, cm ³	HR for worsening of glucose regulation	Tertiles of resected volume, cm ³	HR for worsening of glucose regulation
T1 (17.4–69.2)	1.00	T1 (5.6–87.7)	1.00
T2 (69.2–100.6)	2.27 (1.07–4.82)	T2 (87.7–131.5)	1.40 (0.78–2.52)
T3 (100.6–595.2)	2.00 (0.92–4.32)	T3 (131.5–361.2)	0.86 (0.46–1.62)
Over T2 (≥69.2)	2.13 (1.07–4.23)	Over T2 (≥87.7)	1.11 (0.66–1.88)

Values are presented as HR (95% confidence interval).

DP, distal pancreatectomy; PD, pancreatoduodenectomy; HR, hazard ratio.
