

**Supplementary Table 6.** Association between resting heart rate incidence of diabetes mellitus

| Variable                        | Events (event rate, % <sup>a</sup> ) | Unadjusted          |         | Adjusted            |         |
|---------------------------------|--------------------------------------|---------------------|---------|---------------------|---------|
|                                 |                                      | HR (95% CI)         | P value | HR (95% CI)         | P value |
| <b>Baseline RHR, bpm</b>        |                                      |                     |         |                     |         |
| <60 ( <i>n</i> =2,243)          | 318 (11.4)                           | 0.885 (0.776–1.009) | 0.068   | 1.107 (0.965–1.269) | 0.146   |
| 60–69 ( <i>n</i> =4,641)        | 740 (12.9)                           | Reference           |         | Reference           |         |
| 70–79 ( <i>n</i> =1,177)        | 229 (16.4)                           | 1.277 (1.101–1.481) | 0.001   | 1.174 (1.008–1.368) | 0.040   |
| ≥80 ( <i>n</i> =252)            | 58 (21.4)                            | 1.718 (1.315–2.245) | <0.001  | 1.329 (1.008–1.752) | 0.044   |
| Per 5 bpm increase              |                                      | 1.120 (1.081–1.160) | <0.001  | 1.046 (1.006–1.086) | 0.022   |
| <b>The most recent RHR, bpm</b> |                                      |                     |         |                     |         |
| <60 ( <i>n</i> =2,089)          | 275                                  | 0.840 (0.732–0.963) | 0.013   | 0.913 (0.793–1.050) | 0.201   |
| 60–69 ( <i>n</i> =4,770)        | 802                                  | Reference           |         | Reference           |         |
| 70–79 ( <i>n</i> =1,155)        | 186                                  | 1.026 (0.874–1.203) | 0.755   | 0.709 (0.592–0.850) | <0.001  |
| ≥80 ( <i>n</i> =299)            | 82                                   | 1.598 (1.273–2.006) | <0.001  | 1.554 (1.227–1.967) | <0.001  |
| Per 5 bpm increase              |                                      | 1.074 (1.039–1.111) | <0.001  | 1.001 (0.993–1.008) | 0.860   |

The baseline RHR was adjusted for age, sex, area, body mass index, physical activity, smoking, drinking, systolic blood pressure, antihypertensive drug use, chronic kidney disease, cardiovascular disease, glycosylated hemoglobin (HbA1c), total cholesterol, and creatinine levels at baseline. The most recent RHR was adjusted for sex, area, and the most recent age, body mass index, physical activity, smoking, drinking, systolic blood pressure, antihypertensive drug use, chronic kidney disease, cardiovascular disease, HbA1c, total cholesterol, and creatinine levels.

HR, hazard ratio; CI, confidence interval; RHR, resting heart rate.

<sup>a</sup>Event rate per 1,000 person-years calculated using only baseline RHR.
