

Supplementary Table 3. The association between hypoglycemic status and baseline variables

Variable	OR (95% CI)	P value
eGFR < 60 mL/min/1.73 m ²	1.59 (0.68–3.69)	0.283
Renal failure	1.30 (0.89–1.89)	0.177
Heart failure	0.99 (0.62–1.59)	0.975
Hypertensive disease	1.11 (0.89–1.38)	0.363
Angina	0.99 (0.73–1.36)	0.966
AMI	1.49 (0.90–2.47)	0.126
IHD	1.15 (0.88–1.51)	0.294

Reference 1.0 of control group that consisted of patients without hypoglycemia.

OR, odds ratio; CI, confidence interval; eGFR, estimated glomerular filtration rate; AMI, acute myocardial infarction; IHD, ischemic heart disease.
