

Supplemental Fig. S2. The protein expression of Ca²⁺/calmodulin-dependent protein kinase kinaseβ (CaMKKβ) by dulaglutide (Dula) in palmitic acid (PA) treated cells. HepG2 cells were pre-treated with 400 μM PA for 24 hours, followed by treatment with or without 100 nM Dula for 24 hours. CaMKKβ expression was analyzed using Western blotting. ^a*P*<0.01 compared with control (Con); ^b*P*<0.05 compared with PA-treated Con group.
