

**Supplemental Fig. S2.** Cytotoxic effect of ethanol on  $\beta$ -TC6 cell viability in different concentrations for 24-hour incubation by cell counting kit 8 (CCK8) assays. <sup>a</sup> $P < 0.05$ , <sup>b</sup> $P < 0.01$ , compared with 0 mmol/L group. FA, fraction affected by the dose; FU, fraction not affected by the dose.
