

Supplemental Fig. S2. Tumor microenvironment of *BRAF*-like papillary thyroid carcinoma (BL-PTC) and *RAS*-like papillary thyroid carcinoma (RL-PTC). Abundance of (A) fibroblasts and (B) immune cells in BL-PTCs and RL-PTCs irrespective of clinicopathological factors. Abundance of fibroblasts and immune cells in BL-PTCs and RL-PTCs (C) in all patients and (D) in patients without thyroiditis according to the clinicopathological characteristics. ETE, extrathyroidal extension; LNM, lymph node metastasis; TNM, tumor-node-metastasis; MACIS, metastasis-age-completeness of resection-invasion-size; NS, not significant ($P \geq 0.05$). ^a $P < 0.05$; ^b $P < 0.001$; ^c $P < 0.0001$.
