

Supplemental Fig. S3. Relationship between serum chemistry and muscle fiber characteristics of vastus lateralis. Comparison of type IIa and IIx muscle fiber proportions by (A) serum calcium, (B) vitamin D, (C) C-telopeptide (CTX), (D) procollagen type 1 N-terminal propeptide (P1NP), (E) alkaline phosphatase (ALP), and (F) glucose levels. Data are expressed as mean \pm standard error of the mean.
