

Supplemental Fig. S4. Kaplan-Meier curves of cumulative incidence of microvascular outcomes in patients grouped according to tertiles of 1st-year hemoglobin glycation index variability (top panels A, C, E, and G) and according to tertiles of 1st-year glycated hemoglobin variability (bottom panels B, D, F, and H). T1 is the lower tertile subgroup (blue line), T2 the middle tertile subgroup (green line), and T3 is the upper tertile subgroup (red line).
