Adjusted for age, sex, income, hypertension, dyslipidemia, smoking, alcohol consumption, regular exercise, body mass index, diabetes duration, and insulin, OHA, and glucose levels.

OHA, oral hypoglycemic agent; ESRD, end-stage renal disease; IR, incidence rate; PY, person-year; HR, hazard ratio; CI, confidence interval; CKD, chronic kidney disease.

<sup>a</sup>The adjusted HR was calculated separately for the groups with and without CKD, based on the presence or absence of gout in each group.
