

Supplemental Fig. S2. Survival graphs according to risk factors for overall survival in patients with medullary thyroid carcinoma. (A) Overall survival by age. (B) Overall survival by sporadic versus hereditary disease. (C) Overall survival by tumor size. (D) Overall survival by lymph node (LN) dissection extent. (E) Overall survival by the presence of extrathyroidal extension. (F) Overall survival by the presence of LN metastasis. CND, central node dissection; LND, lateral node dissection; CN, central node.
