PFS, progression-free survival; HR, hazard ratio; S-GRAS, Stage, Grade, Resection status, Age, Symptom; CI, confidence interval.
[a]S-GRAS components: European Network for the Study of Adrenal Tumour (ENSAT) stage (S), grading (G), resection status (R), age (A), and tumor- or hormone-related symptoms (S); [b]Patients subjected to S-GRAS analysis who underwent adrenalectomy and had available Ki-67 indices for S-GRAS scores; [c]P values comparing Harrell's C-index of grading with that of S-GRAS score; [d]P values comparing Harrell's C-index of grading with that of S-GRAS groups; [e]Significant results (P<0.05).
