

Supplemental Table S2. Metabolic Target Achievement Rate among Those with ASCVD

Variable	Primary (n=2,915)	Tertiary (n=312)	P value
ASCVD (+)	421 (14.4)	58 (18.6)	
Glycemic control (HbA1c <6.5%)	73 (17.3)	18 (31.0)	0.171
BP control (BP <130/80 mm Hg)	111 (26.4)	42 (72.4)	<0.0001 ^a
Dyslipidemia control (LDL-C <70 mg/dL)	70 (16.6)	26 (44.8)	0.002 ^a

Values are expressed as number (%). P values refer to the chi-square test or the Fisher exact test.

ASCVD, atherosclerotic cardiovascular disease; HbA1c, hemoglobin A1c; BP, blood pressure; LDL-C, low density lipoprotein cholesterol.

^aValues with statistical significance.
