

Supplementary Fig. S2. MLH1 immunohistochemistry results for *MLH1*-methylated sessile serrated adenomas/polyps (SSA/Ps). (A) A case of *MLH1*-methylated non-dysplastic SSA/P, showing intact MLH1 expression. (B, C) A case of *MLH1*-methylated non-dysplastic SSA/P, showing partial loss of MLH1 expression. Note the MLH1-negative crypts (in red-lined circles) in the background of MLH1-positive crypts. (D) A case of *MLH1*-methylated dysplastic SSA/P, showing complete loss of MLH1 expression.
