

A B C

Supplementary Fig. 6. Left gonadal vein dilation.
A. Multiplanar maximum intensity projection image from abdominal magnetic resonance venography demonstrates a dilated left gonadal vein (arrow). B. Three-dimensional reconstruction from abdominal magnetic resonance venography confirms dilation of the left gonadal vein (arrow). C. Axial magnetic resonance venography image shows the left gonadal vein measuring approximately 9.6 mm in diameter (arrow). Image courtesy of Karla Porto, MD.
