Asami Ikeda, et al. Prognostic value of serum LDH in ovarian cancer

A set

**Supplementary Fig. 4.** The upper 3 panels and lower 3 panels show the Kaplan-Meier curves for the platinum-free interval, disease-free survival, and overall survival in groups A and B, respectively. Dotted lines depict high total cholesterol (TC) levels (≥200 mg/dL), while solid lines depict low TC levels (<200 mg/dL). <sup>a)</sup> $P < 0.05$ .
