

Supplementary Table 2. Comparison of the malignant lymphoma diagnoses after 22-G needle biopsy

	Value (n=12)
Size of needle (22-G/25-G)	12/0
Puncture route	
Transesophageal	0
Transgastric	11 (91.7)
Transduodenal	1 (8.3)
No. of passes	4 (2–6)
Sensitivity	
Cytology	9 (75.0)
Histology	10 (83.3)
IHC evaluation rate in histological specimen	10 (83.3)
Flow cytometry	10 (83.3)
Cytogenetic assessment	6 (50.0)
Diagnostic rate of WHO classifications	10 (83.3)

Values are presented as number (%) or median (range).

IHC, immunohistochemistry; WHO, World Health Organization.
