

Supplemental Data Fig. S2. Spearman correlation of CD4⁺T regulatory cells (CD4⁺CD25⁺FoxP3⁺) with (A) CD4⁺CD28⁻CD57⁺T cells ($r=-0.29$, $P=0.019$), (B) CD8⁺ terminally differentiated effector memory cells re-expressing CD45RA (TEMRA) cells (CD8⁺CD45RA⁺CCR7⁻) ($r=-0.30$, $P=0.014$). Data for this analysis were not included in the original study and were acquired from the biobank of our center.
