

**Supplementary Table 3.** Relative risk analysis of early enteral nutrition compared to those of delayed enteral nutrition in patients with non-shockable initial rhythm

	Relative risk	95% CI
Aspiration pneumonia	1.03	0.73–1.47
Regurgitation	1.01	0.80–1.28
Ileus	0.95	0.85–1.05
Fever	0.67	0.38–1.18
Hypoglycemia	1.03	0.73–1.47
Hyperglycemia	1.79	0.86–3.71
Good neurologic outcome	1.69	1.05–2.71
Survival to discharge	3.58	1.21–10.57

CI: confidence interval.
